

Pratil Dubey

Bengaluru, Karnataka, India | (+91) 9658808474 | itspratil@gmail.com | github.com/pratil | linkedin.com/in/pratil

TECHNICAL SKILLS

Programming Languages: Go, Java, JavaScript, C++, Ruby
Frameworks & Libraries: Spring Boot, React, Ruby on Rails, Cocos2d-x, Unity
Databases: MongoDB, Redis, PostgreSQL

WORK EXPERIENCE

Widefield Security

Software Developer | Remote | October 2025 - January 2026 (3 Months)

- Worked on backend services for a US-based cybersecurity startup using Go.

Gameberry Labs

Software Developer II | Bengaluru, Karnataka, India | October 2022 - September 2025 (3 Years)

- Member Progression System
 - Designed and implemented a configurable member progression system supporting engagement-based progression and rewards through gifting, messaging, and voice activity.
 - Designed runtime state management for progression data with different persistence and reset lifecycles, enabling efficient state synchronization while minimizing impact on user-facing APIs.
- Stateful Real-Time Club Backend
 - Developed backend features for a stateful real-time social platform supporting live voice chat, messaging, gifting, and multiplayer game sessions.
 - Implemented low-latency features by leveraging in-memory runtime state while coordinating persistent and transient data across MongoDB and Redis.

OYO Rooms

Software Developer | Hyderabad, Telangana, India | August 2020 - September 2022 (2 Years)

- Configuration-Driven API Orchestration Framework
 - Built a configuration-driven API orchestration framework for the BFF layer, allowing new APIs to be added through configuration instead of code changes.
 - The framework called downstream APIs and transformed request/response payloads, significantly reducing boilerplate code and eliminating deployments for most API additions.
- Metadata-Driven UI Composition Framework
 - Built a metadata-driven UI composition framework that enabled pages to be assembled through backend configuration instead of frontend code changes, making the frontend a generic renderer for reusable widgets.
 - The framework dynamically composed pages by configuring widget layout, properties, actions, and API bindings through metadata, allowing widgets to fetch data and trigger backend APIs without frontend code changes, significantly reducing frontend deployments and accelerating UI changes.

OYO Rooms

Software Developer Intern | Hyderabad, Telangana, India | September 2019 - July 2020 (11 Months)

EDUCATION

Bachelor of Technology in Computer Science

KIIT University | Bhubaneswar, Odisha, India
2016-2020 | GPA: 8.7/10
